TC 1700

SIGNATURE OF APPLICANT, ATTORNEY, OR AGENT	
Firm or Individual name	Alfred Stapler, Esquire Volpe and Koenig, P.C.
Signature	<i>A Stapler</i>
Date	3/22/01
Reg. No.	16,675

CERTIFICATE OF MAILING			
I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Commissioner for Patents, Washington, D.C. 20231 on this date: 22 March 2001			
Typed or printed name	Alfred Stapler, Esquire		
Signature	<i>A Stapler</i>	Date	3/22/01

Burden Hour Statement: This form is estimated to take 0.2 hours to complete. Time will vary depending upon the needs of the individual case. Any comments on the amount of time you are required to complete this form should be sent to the Chief Information Officer, Patent and Trademark Office, Washington, DC 20231. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Assistant Commissioner for Patents, Washington, DC 20231.

**PATENT**

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In the **PATENT APPLICATION** of:

Magerl et al.

**Application No.:** 09/701,104

**Filed:** 26 May 1999

**For:** COMPOSITE OF POLYMER OR  
CERAMIC MATERIALS AND  
COMPONENT MADE OF SUCH A  
COMPOSITE

**Group:** Not Yet Known

**Examiner:** Not Yet Known

**Our File:** LUD-PT002  
(PA1083US)

**Date:** 22 March 2001

**INFORMATION DISCLOSURE STATEMENT**

Commissioner for Patents  
Washington, D.C. 20231

Sir:

This Information Disclosure Statement is being filed under 37 C.F.R. 1.56.

This Statement cites thirteen (13) references, identified as items AA through AM on enclosed Form 1449. A copy of each of these items (AA-AM) is also enclosed.

Four (4) of these cited references are not in the English language and translations are not readily available. These four references are identified as item AH (which is in French), and items AI, AJ and AK (all three of which are in German).

To facilitate their consideration, there follow translations of their respective titles and abstracts.

RECEIVED  
MAY 28 2002  
TC 1700

**Applicant:** Magerl et al.  
**Application No.:** 09/701,104

### **TRANSLATION**

of title and abstract of French patent publication 2555902 (item AH on enclosed Form 1449).

**Title:** Surgical Implants Of A Composite Carbon/Carbon Material, Especially Useful In Orthopaedics And In Traumatology.

**Abstract:** The present invention relates to surgical implants characterized in that they are manufactured starting from a block of composite carbon/carbon obtained by densifying carbon fibers through chemical deposit in the fluid phase of a pyrocarbon material.

According to the invention, the implants have the additional property of being detectable by radiologic examination.

### **TRANSLATION**

of title and abstract of German patent publication DE 3602721 (item AI on enclosed Form 1449).

**Title:** Implant.

**Abstract:** An endodontic implant (1, 11, 17) of a biologically compatible material possesses, for producing a high-contrast x-ray image, at least one marker portion (4, 4') of a material having high x-ray contrast.

**Applicant:** Magerl et al.  
**Application No.:** 09/701,104

### **TRANSLATION**

of title and abstract of German patent DE 3904595 (item AJ on enclosed Form 1449).

**Title:** Apparatus for Determining the Spatial coordinates of stereotactic aiming points by means of x-ray pictures.

**Abstract:** The invention relates to an apparatus for the drafting-less spatial determination of the stereotactic aiming points by means of a head-band or other fixation apparatus connecting at least four x-ray permeable plates; each two of these being parallel to receive between them the head or the affected body part of the patient to be treated and placed opposite each other in pairs; each plate pair being provided with corresponding markers which -- superposed on each other -- are reproduced on the x-ray picture of the head or the affected body part together with the determining aiming point, so that the spatial location of the aiming point can be determined by two orthogonal x-ray pictures.

The invention has the object, in an apparatus of the kind under consideration, to form the markers in such a way that use of the x-ray images is simplified and evaluation errors are especially prevented. Also, unambiguous, visual control is to be provided for adjustment of the stereotactic x-ray apparatus, in order to enhance the precision of stereotactic treatments.

**Applicant:** Magerl et al.  
**Application No.:** 09/701,104

The solution is characterized in that the markers consist of several wires in the form of semicircles or polygons, which strongly absorb the x-ray radiation and which are located on or in the plates.

### **TRANSLATION**

of title and abstract of German patent publication DE 423339 (item AK on enclosed Form 1449).

**Title:** Implant.

**Abstract:** For the production of implants there is proposed a choice of material which imparts to the implant improved tribologic characteristics consisting particularly in low abrasion. The use of carbon fibers of a Peck precursor, in a matrix of pressure setting plastic provides a combination which gives to the implant good sliding properties with low abrasion and the composite material simultaneously exhibits sufficient compressive strength.

**Applicant:** Magerl et al.  
**Application No.:** 09/701,104

It is requested that the cited references be considered and that a copy of Form 1449 be returned to the undersigned with the next Office Action, initialed by the Examiner to confirm such consideration.

Respectfully submitted,

Magerl et al.
